Boss Buck Gravity Feed Heads

1. Attach gravity head to the feeder hopper. Align the logo on feeder hopper with the logo on the 3 or 4 way

2. Adjust the inner sleeve of the gravity head by pushing the head itself up or down. Start all the way up. Leave bolts loose to allow head to move up and down.

3. Pour a small portion of preferred material (corn, protein, etc.) into the hopper. Push gravity head down (slowly) until desired flow is achieved.

4. Snug bolts down.
